

DIESEL INJECTOR CLEANER & FUEL CONDITIONER

Spanjaard Diesel Injector Cleaner and Fuel Conditioner enhances the cetane number by 2 points. Protects the fuel system, reduces harmful deposits and improves performance. For all automotive, marine and stationary diesel engines.

PERFORMANCE CLAIMS

Spanjaard Diesel Injector Cleaner & Fuel Conditioner's performance claims: -

- Boosts cetane number by 2 points.
- Ensures fuel injection cleanliness - Superior rating in Cummins L10 test.
- Up to 3% improved fuel economy.
- Up to 14% reduced exhaust emissions.
- Improved fuel stability during storage.
- Dispersancy for insoluble gums.
- Improved lubricity and anti-wear (injectors and system parts).
- Premium corrosion protection.
- Prevents stable fuel-water emulsions.
- Reduced foam formation for faster fill-ups.

APPLICATION INSTRUCTIONS

Spanjaard Diesel Injector Cleaner & Fuel Conditioner must be added at recommended dosage: 375ml treats up to 75 litres of diesel fuel (1:200) in order to be effective. Add before filling up with fuel. For bulk users it is best to dose the fuel storage tanks.

BACTERIAL GROWTH:

It is good operating practice to fill vehicle diesel fuel tanks at the end of an operating day to minimise condensation of water at night in the fuel tanks. Bacteria present in the atmosphere are able to live in the water phase and feed off hydrocarbon or sulphur in the fuel. Bacterial waste products end up blocking fuel filters and fuel tanks. Prevention is always better than cure.

TYPICAL PROPERTIES

Appearance	Dark Brown
Density, g/ml	0,76
Viscosity @ 25°C, cSt	14,5

HANDLING AND STORAGE

HARMFUL. May be fatal if swallowed and enters airways. If swallowed immediately call a poison centre or doctor. Keep out of reach of children.

PACKAGING

375ml bottle, 5litre, 20litre, 210litre
