

DPF CLEANER

Spanjaard DPF Cleaner is a powerful regeneration catalyst which assists the cleaning of blocked diesel particulate filters (DPF).

Most DPF filters require periodic high-temperature operation in order to fully burn off accumulated soot. This is not always achieved during the short distances the typical person travels (i.e. city driving).

Spanjaard DPF Cleaner reduces the temperature at which the accumulated soot burns off at, thereby allowing the DPF to regenerate at temperatures not usually achieved during city driving.

APPLICATION

- Reduces soot build up on sensors and particulate filters.
- Cleans as you drive – no dismantling required.
- Reduces emissions
- Suitable for use with all types of diesel fuel and engines.

APPLICATION INSTRUCTIONS

Add entire contents to fuel tank before filling up with fuel. For optimum results repeat with every tank of diesel or as required. One bottle treats up to 75lt of diesel.

TYPICAL PROPERTIES

Colour	Clear colourless to pale amber liquid
Density, (25°C), g/ml	0,80

HANDLING AND STORAGE

May be fatal if swallowed and enters airways. If swallowed immediately call a poison centre or doctor. Keep out of reach of children.

PACKAGING

375ml bottle

CP/mg/DPF Cleaner – May 2016

Certified as an
ISO 9001 Manufacturer
