

## MAG WHEEL AND TYRE CLEANER

A powerful aerosol cleaner for all types of alloy wheels and tyres. Spray the quick-breaking foam onto cool mag wheels to easily lift dirt and brake residues. Can be sprayed at any angle even upside down (360° valve). Spray on – wash off. Cleans all wheels like magic.

### APPLICATIONS

The high temperatures produced by front disc brakes transfer to the mag wheels. Regular cleaning with Spanjaard Mag Wheel Cleaner ensures that the brake residues and dirt do not bake themselves into the clear lacquer which is used as the finishing coat on mag wheels. Spanjaard Mag Wheel Cleaner leaves behind a protective layer to retard adhesion of dirt and brake residues making subsequent cleaning easier. The more you clean the easier it gets.

### APPLICATION INSTRUCTIONS

Treat one wheel at a time. Shake can well before use. Spray foam onto **cool** wheels and allow foam to loosen dirt and brake residues for 1 minute. Use a soft wheel brush or paint brush to work loose stubborn dirt and to access difficult areas. Flush wheel rims and tyres well with water, ideally using a hosepipe and high pressure connection. Aerosol can sprays out in any direction even upside down. (360° valve)

### TYPICAL PROPERTIES

Colour	clear
Density @ 25°C, ml	1,03
pH	11,0

### HANDLING AND STORAGE

Store under cover. Flammable Aerosol. Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50°C. Keep away from heat / sparks / flames / hot surfaces. No Smoking. Do not pierce or burn, even when empty. Do not spray onto an open flame or any incandescent material. 30% by mass of the contents are flammable. Keep out of reach of children.

### PACKAGING

400ml aerosol

CP/mg/Mag Wheel – June 2016
