

PETROL INJECTOR CLEANER

A high quality petrol injector cleaner that removes gum and varnish deposits from the injection and fuel system while you drive.

APPLICATIONS

To clean dirty petrol injectors and fuel systems.

Recommended for sluggish engines due to sticking injectors.

Contains no phosphorous, zinc, magnesium or other heavy metal components that would induce harmful chemical reactions to the catalytic convertor exhaust systems used in motor vehicles.

The additives used are approved by the Californian Air Resources Board for use in low exhaust emission vehicles.

APPLICATION INSTRUCTIONS

a) To keep injectors clean:

1. Pour contents into petrol tank and repeat every 1 000km.

b) Workshop use:

1. Remove vacuum hose from inlet manifold pressure regulator, insert hose into Petrol Injector Cleaner bottle.
2. Start engine and run at fast idle until bottle is empty (excessive white smoke will temporarily come out of exhaust).
3. Replace vacuum hose and run engine until exhaust smoke has cleared.

TYPICAL PROPERTIES

Appearance	Brown liquid
Density, g/ml	0.78
Viscosity @ 25°C, cSt	16

HANDLING AND STORAGE

May be fatal if swallowed and enters airways. If swallowed immediately call a poison centre or doctor. Keep out of reach of children.

PACKAGING

375ml bottle
