

POWER STEERING FLUSH

Spanjaard Power Steering Flush is formulated with a special blend of additives to clean and prepare power steering systems for new fluid.

APPLICATION

- Compatible with all power steering fluids.
- Removes sludge and varnish deposits.
- Ensures optimum performance of the new fluid.
- Safe on all seals and contains no harmful solvents.

APPLICATION INSTRUCTIONS

Drain 250ml of the old fluid.

Add full contents of the Power Steering Flush tin (250ml) directly to power steering fluid reservoir.

Move steering wheel fully to the left and right a few times over a 30 minute period to circulate the flush fully into the existing fluid

Drain reservoir completely and refill with new fluid according to vehicle manufacturer's specifications.

TYPICAL PROPERTIES
