

TYRE FIX

Spanjaard Tyre Fix is a propellant and rubber latex emulsion, which inflates and then seals small holes in conventional and radial tubed or tubeless tyres.

APPLICATIONS

Spanjaard Tyre Fix is a puncture repair kit that allows you to get going quickly without a wheel change. One can is enough for one car tyre.

The Tyre Fix 600ml (4x4) should be used for the larger tyres found on 4x4's, SUV's and Double-Cabs.

Especially useful these days when being stuck at the side of the road can also be unsafe.

Spanjaard Tyre Fix is not suitable for large holes, rim leaks, tyre sidewall damage or faulty valves.

APPLICATION INSTRUCTIONS

1. Remove object causing puncture and deflate tyre completely.
2. Remove safety cap on the aerosol.
3. Shake can well. If can is cold, warm in hands or in front of heater vent.
4. Screw connector tube firmly onto tyre valve.
5. Hold can upright and depress actuator until can is empty.
6. Disconnect from tyre valve.
7. At this stage tyre may not be fully inflated, which is normal.
8. Drive off immediately (2-4km) to effect puncture seal.
9. Check and correct tyre pressure as soon as possible.

10. Travel at reduced speed and as soon as possible have your tyre checked by an expert for possible damage and affect a proper repair.

TYPICAL PROPERTIES

Colour	Cream
Smell	Ammonia
Density at 25°C, g/ml	1,00

HANDLING AND STORAGE

Extremely flammable aerosol. Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50°C. Keep away from heat / sparks / flames / hot surfaces. No Smoking. Do not pierce or bum, even when empty. 40% by mass of the contents are flammable. Causes serious eye damage. May be harmful if swallowed. Keep out of reach of children.

STORE CONTAINER IN BOOT OF CAR AND NOT IN CUBBY HOLE.

PACKAGING
